Bensalem, PA 19020

WHAT IS A SHARP?

- ✓ Needle: a very fine, slender, hollow piece of metal used to inject medication under the skin
- ✓ Syringe: device which a needle is attached to in order to inject medication into or withdraw fluid from the body
- ✓ Lancet, also called a fingerstick: instruments with a short, two-edged blade used to get drops of blood for testing
- ✓ Auto injector, including epinephrine pens: syringe pre-filled with fluid medication designed to be self-injected into the body

WHAT IS NARCAN?

NARCAN® (Naloxone HCl) Nasal Spray is used for the emergency treatment of a known or suspected opioid overdose.

Narcan Kit includes:

- 2 doses of Narcan
- Mouthshield
- Gloves
- Resources

One Narcan Kit per car while supplies last.

Disposing of individual sharps? Simply place them into the collection container on-site.

If you collect your sharps in a container: Make sure they are placed in a heavy duty plastic container, like a bleach or laundry detergent container or a coffee can with a lid. The lid must be tightly secured to the container, and then sealed with heavy duty tape and marked as "sharps" or "needles." Please do not bring sharps in a light-weight bottle such as a water bottle.
